Providing Alternative Medicine and Compassionate Care to Veterans

The Cannabis Medical Treatment Plan is an alternative solution to the current overprescription of opioids and provides a perpetual service cycle for non-invasive patient care using cannabis for treatment.

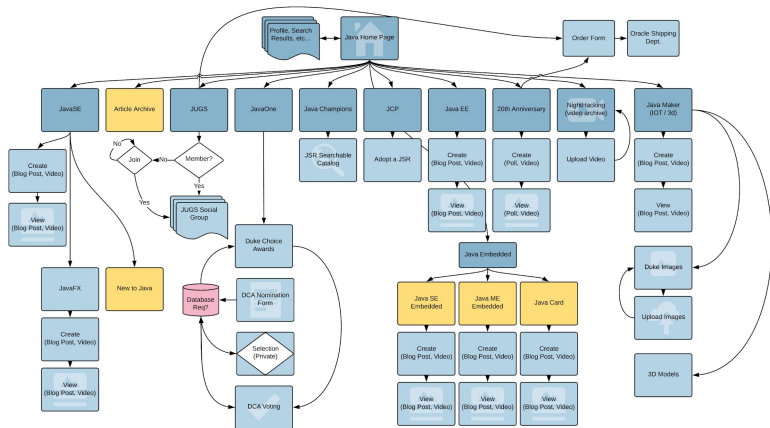

The plan provides an open communication channel where patient, physician and dispensaries can communicate in a realtime format.

Migrating Java.net to an Integrated Jive Community Platform

As Oracle rebranded Java and sunset the expansive Java.net website, internal and external stakeholders came together to consolidate and migrate archived content to a new Jive client.

A custom template was designed in conjunction with an upcoming Java conference. Flow diagrams, wireframes, graphics, sprites, HTML, CSS, & Javascript files were created and handed off to Oracle offshore developers for implementation.

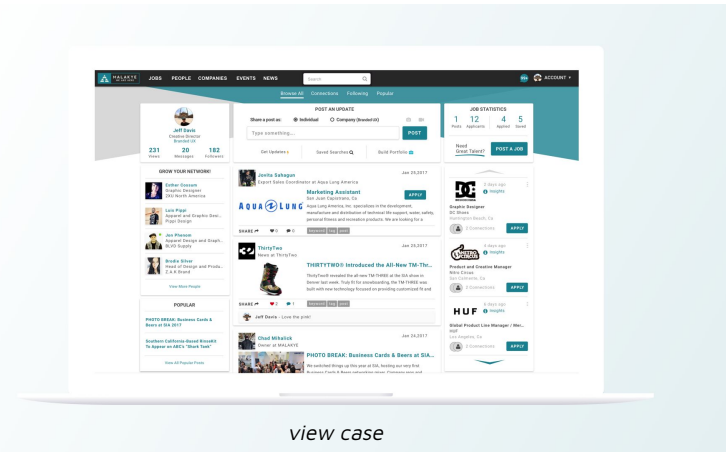

Driving Engagement in the Lifestyle Workplace Community

Malakye is an industry specific job board with roots in the Southern California action sports manufacturing mecca.

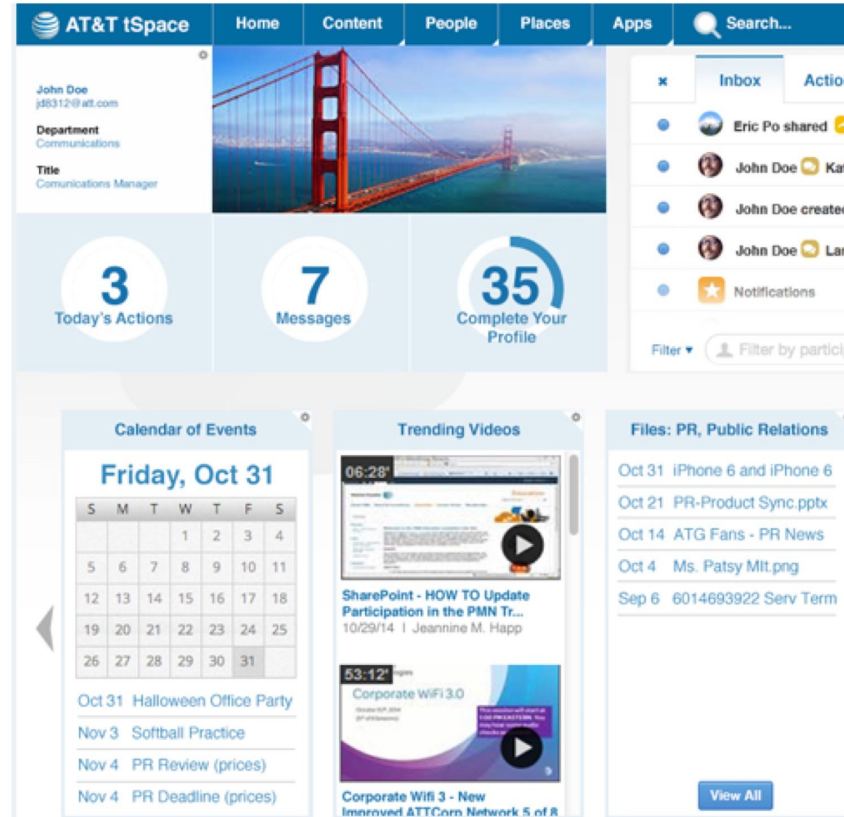

Established apparel behemoths such as Billabong, Oakley and Volcom mix it up with fun-first boutique and startup brands like Amuse Society, We The Trees & Nitro Circus seeking out great talent, syndicating news about product lines and posting new employment opportunities.

Enterprise Integration for True Internal / External Collaboration

Proposal for At&t tSpace demonstrating best-in-class collaboration utilizing existing IBM and At&t proprietary software integrated with a custom solution modeled on a Jive client.

The 50+ page proposal deck showcases day in the life walkthrough scenarios based on employee interview data spotlighting the biggest day to day pain points and matches them with proposed solutions in a feature comparison matrix.

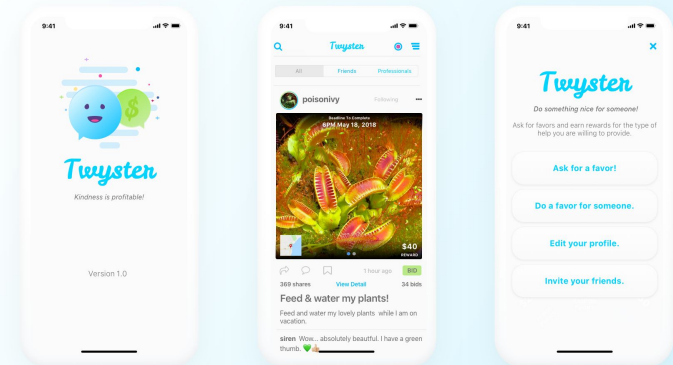

Enabling a Localized Altruistic Workforce

Twyster is an app focused on building a compassionate community of people willing to offer their time to others in the form of favors. Friends, family and professionals bid for opportunities to help others and are rewarded for their good deeds.

The app is designed with the intention of disrupting the job market based on the belief that "Kindness is profitable" and that asking for favors is one of the best ways to foster friendship.
